

I recently attended the two-day “Operating a Successful TRIP Program” training and came away very impressed with the training. I learned about the TRIP Program in great detail and was exposed to all of the everyday TRIP Program functions. I highly recommend this hands-on training to anyone that is considering starting your own TRIP type service in your community.

Because I am a firm believer of not reinventing the wheel, I attended the ILP's two-day training to learn firsthand how to operate a TRIP Transportation Program. From the moment I walked in the door, Rich Smith and his staff made me feel at home. Their knowledge and patience combined with a relaxed but professional environment helped me gain the confidence that I will be successful from the start. The hands-on experience of entering real time information and being involved in the decision making process for applicants reinforced the learning process. If you are planning on implementing a successful TRIP Transportation Program, I highly recommend the TRIP training provided by Rich and his staff at Independent Living Partnership.
