The California Department of Rehabilitation (DOR) recently convened a task force to address this issue and wants your input. DOR is asking Californians to send their comments, recommendations and observations on what should be available for consumers by the year 2015. Send your ideas and comments to editor@toolsforindependence.org and we'll forward them to the TF.

Here's a Reader's Energy Saving Tip:

Bob in Boynton Beach, FL tells TOOLS that since his primary use for hot water is for showering, "I set my hot water thermostat to a temperature that is comfortable for that purpose. When I need hotter water for the dishwasher after an occasional dinner party or for laundry every 10 or so days, I temporarily increase the temperature. That way I neither waste energy or risk burning my skin. And it is a money saver as well!"
