## Checklist For Preventing Falls At Home

Every year, thousands of older adults fall and hurt themselves. Falls are one of the main causes of injury and disability in people age 65 and older. Those who fall once are 2 to 3 times more likely to fall again. Falls are often caused by hazards that are easy to overlook. However, these hazards can also be easy to fix.

- ▶ Move furniture so that your path through a room is clear.
- ▶ Remove throw rugs on floors or use double-sided tape or a nonslip backing so the rug won't slip.
- ▶ Always keep objects off the floor. Pick up papers, books, shoes, or other things that are on the floor
